with **DASH DDX™**
Document Management Software
for SYSPRO

Now there's document management software for small- and medium-size companies that offers "big league" functionality and features, at a fraction of the price.

Built from the ground up to work with your business software, Dash DDX™ software integrates seamlessly with SYSPRO™ and most business systems. It's easy to configure and customize for your specific requirements. Best yet, it's one of the simplest, most intuitive programs to learn and use on the market today.

And thanks to DDX™ software's quick start-up, you'll reap industry-leading returns on your investment from day one.

Simply the Best, Most Affordable Document Management Software for Small- to Medium-Size Business

Cuts document and storage costs as much as 90%!

Single-Source Document/Records Storage and Indexing

Quickly find all your documents in one place, with our easy, multi-dimensional index and intuitive search criteria. Search for Word documents, pdfs, Excel files, images and more!

Blazing-Fast Search and Retrieval

Sift through thousands of documents in seconds, for the answers you need now. Link DDX™ software directly to your SYSPRO system for a context-sensitive search to take customer service to the next level!

Controlled Electronic Routing/Workflow

Automate your document review and approval processes by managing workflow electronically. Documents and status are visible to all stakeholders, from inception to completion.

Access from Anywhere, Anytime

Access your library and archives anywhere on your network, including remote access. No more hanging up the phone to find a file!

Automated Distribution

Just print, and DDX™ software will distribute your docs by email, fax and/or to multiple printers. Individual delivery preferences allow you to adjust distribution methods to the needs of individual customers.

Intelligent Form Recognition and Filing

Train DDX™ software to recognize your forms, then it automatically categorizes, distributes and manages them in a consistent, controlled process. Works with almost any form you print from your business system—even scanned forms!

Controlled Risk

Data is automatically captured and categorized; encrypted for safety, compressed and archived to make best use of your resources. No more risk of damaged or lost information.

Customizable Security

Manage who sees what docs and when, with controlled access to who can view, modify or delete records.

Flexible Administration Tools

Enjoy flexibility in establishing policies and protocols for managing security, document types, document retention, revisions, custom views, user access and more.

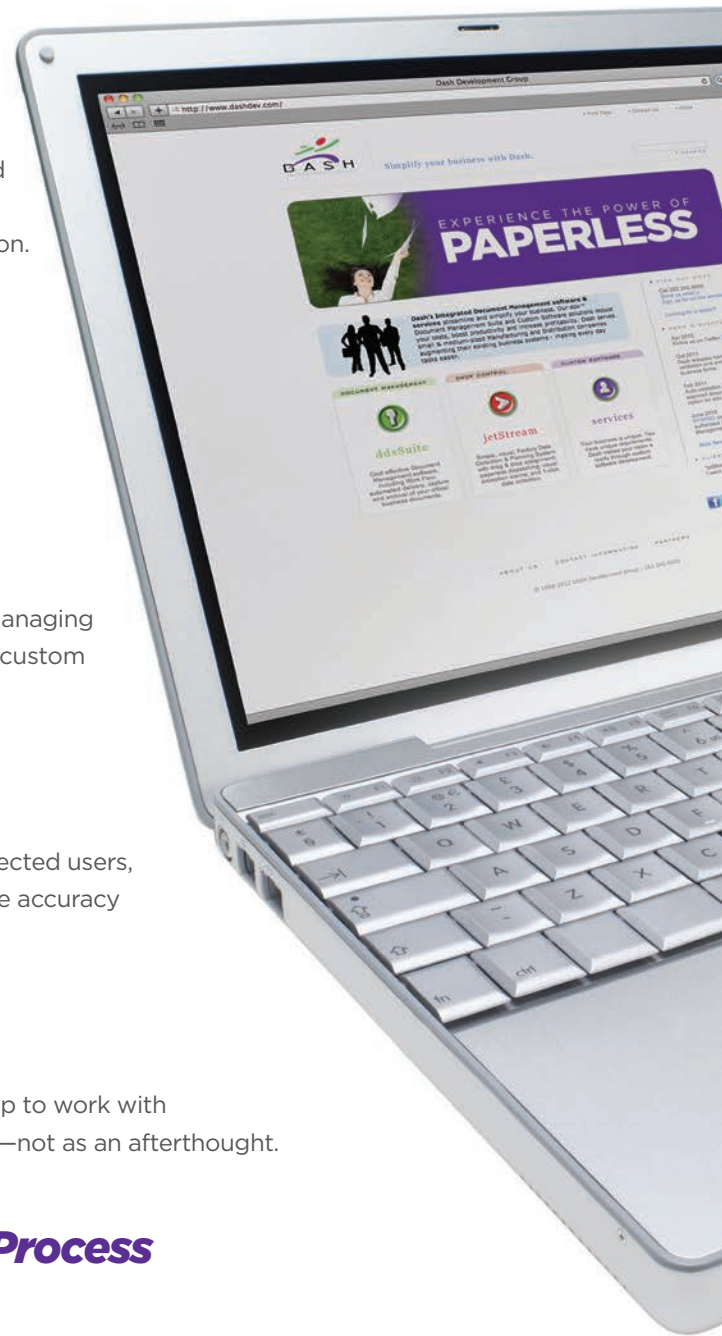

Revision and Version Control

Preserve your revision history, control changes and, for selected users, restrict viewing to the latest, most current version to assure accuracy and eliminate errors from outdated data.

Pre-Integrated with SYSPRO ERP

Enjoy fast ROI with software that's built from the ground up to work with SYSPRO and other business, accounting and ERP systems—not as an afterthought.

All This...in a More Sustainable Process
